

Unitask Software Partners for Global Expansion with Blue Turtle

Partnership Delivers Value for South African Oracle EBS Customers Globally

Bloomfield Hills, Michigan- (April 29, 2015)- Building upon the success of its Partner Advantage Program, Unitask Software has announced an International Partnership with Blue Turtle Technologies, a South African Solutions Provider for the delivery of Oracle EBS Automation solutions.

Partnering with Blue Turtle, a leading solutions provider for Oracle EBS application management will allow Unitask Software solutions tailored for the Oracle E-Business Suite to be readily available for deployment via the Blue Turtle team. Understanding and designing solutions to meet the automation and modernization needs as customers move to the newest versions of Oracle's EBS Application, the partnership will allow for full transparent integration of Migration and Promotion processes in Global implementations.

"The Global EBS marketplace has directed us to search out and partner with Best of Breed Partners who are like minded in their determination for timely completion and success. Tom and the Blue Turtle Team fit those criteria as we bring full implemented automation solutions to the Oracle EBS world," said Dale D. Royal, Chairman & CEO of Unitask.

"Unitask's software solutions add tremendous value to our clients in Southern Africa – full stop. The ability to natively manage the development and release processes in an Oracle EBS landscape saves a lot of time and effort compared to what we are seeing customer teams doing with scripts and/or manual work. Unitask automates the movement of code, keeping change packages in sync and ensures the application and infrastructure teams know exactly what is coming down the line and when. If you have Oracle EBS, you need Unitask." shared Tom Erlank, Head of Application and Data Management at Blue Turtle.

About Unitask Software

Unitask Software develops and deploys solutions that accelerate the realized value of Oracle E-Business Suite Implementations. Based upon over a decade of experience in the Oracle E-Business Suite enterprise, Unitask products eliminate implementation and operational risk of the installation, while improving the application quality and usability.
