

Unitask Software Introduces Command Center for Output Management

Command Center for Output Management delivers Automated Print Fax Email for Oracle EBS

Bloomfield Hills, Michigan. As a leading provider of Oracle E-Business Suite solutions, Unitask Software today announced the immediate availability of Command Center for Output Management.

“With the wide deployment of output management technologies such as printers, faxes, email and storage repositories scattered across the modern enterprise, the ability to quickly and efficiently harvest, set up and manage each device for their associated Oracle EBS applications is not a luxury, it is a necessity. By introducing Command Center for Output Management, we look to deliver a singular view for unified management, control, and consistency that ensures maximum availability and utilization of all resources across a wide enterprise”, states Dale D. Royal, Chairman and CEO of Unitask Software.

Available for Oracle E Business Suite implementations centered upon R11.5 as well as R12 releases, Command Center for Output Management provides an advanced methodology of automated harvesting of in place systems, printers, style & faxes, thereby reducing operations burden on staff as well as the time drag prior to receiving business critical output. Delivering an interactive graphical view, Command Center quickly enables and expands the users ability to print, fax, email or store Oracle EBS information as needed. This enabling view allows for optimum availability and utilization of resources at an affordable rate.

“As a technology solutions provider, the growth of our business is centered upon solutions that facilitate responsiveness and customer service. Delivering anything short of excellence in user experience directly translates to a loss of business, prestige, and ultimately revenues”, said Royal. “Delivering this solution helps augment those enterprises that are not only geographically dispersed, but preparing to deploy premise based, cloud based and a hybrid mix while maintaining resource and budget integrity.”

About Unitask Software

Unitask Software develops and deploys solutions that accelerate the realized value of Oracle E-Business Suite Implementations. Based upon over a decade of experience in the Oracle E-Business Suite enterprise, Unitask products eliminate implementation and operational risk of the installation, while improving the application quality and usability.
