Unitask Announces New Distributor Alliance with Triscal: *Partnership Marks Unitask's Entry into the Brazilian Marketplace*

Cincinnati, OH—November 23, 2009—Unitask Software, as leading provider of solutions for the Oracle E-Business Suite application market, today announced a new distributor alliance with Triscal, a leading firm with offices in São Paulo and Rio de Janeiro, Brazil. With this new relationship, Unitask enters the Brazilian marketplace and Triscal has added to their already impressive portfolio of partnerships, which includes Oracle and IBM.

Unitask's Migration Director (for object migration and promotion) delivers an ROI often achieved in fewer than six months by providing a consistent methodology of insight, control, and management. Unitask's Output Director (for printer configuration) has been key for Oracle E-Business Suite customers in meeting deadlines, reducing the pressure on support personnel, and improving printer security. Both solutions are Oracle-certified and eliminate many of the operational challenges organizations face in the implementation and deployment of the Oracle E-Business Suite.

Triscal is a consulting company with a primary focus on implementing Oracle's E-Business Suite and Siebel products. Triscal also offers solutions and services for business intelligence, data warehousing, BPM and SOA initiatives, IT governance, and provides remote DBA support. Their premier consulting enables their customers to select best-of-breed applications based on expert advice, and their services have helped global business like GE, Accor, and Deutsche Bank improve internal processes and operations to yield significant efficiency gains.

"We are pleased to partner with Triscal to help companies worldwide better leverage their technology investments," said Dale D. Royal, Unitask Chairman and CEO.

"Especially in today's market, every enterprise must make the most out of their existing infrastructure, as well as ensure that new projects are implemented on budget and on time."

"Triscal's expertise in Brazil and Unitask's experience in the Oracle marketplace makes this a natural alliance that will benefit businesses with operations in the region," said Pedro Henrique Cerviño, Triscal Founder and Director. "We are excited to be able to offer even more options to our customers."

About Unitask

Unitask is committed to helping organizations implement, manage and run their Oracle E-Business Suite. Unitask creates, sells and supports software products based on experience gained from over a decade of Oracle E-Business Suite implementation projects. Customers of the Oracle E-Business Suite around the world rely on Unitask products to eliminate implementation and operational risk, improve the quality of the

application and accelerate time-to-value. For more information, please visit www.unitask.com.
