

## **FOR IMMEDIATE RELEASE**

### **Unitask Software Announces Growth in Fiscal 2009**

*Ohio Based Software Company Reports 33 Percent Increase in Customer Installed Base and 25 Percent Increase in Revenues*

**Cincinnati, OH—January 6, 2010** — Unitask Software, as leading provider of solutions for the Oracle E-Business application market, today announced a 33 percent increase in the company's installed base in Fiscal 2009.

In Fiscal 2009, revenues also increased by 25 percent as compared to Fiscal Year 2008. Overall company revenues were on target with company expectations.

“Despite the global financial crises, we experienced significant demand for Unitask products in 2009,” said Dale D. Royal, Unitask Chairman and CEO. “We are delighted that our investments in research and development as well as in services and support have translated into a strong showing in the market.”

Unitask's Migration Director (for object migration and promotion) delivers an ROI often achieved in fewer than six months by providing a consistent methodology of insight, control, and management. Unitask's Output Director (for printer configuration) has been key for Oracle E-Business Suite customers in meeting deadlines, reducing the pressure on support personnel, and improving printer security. Both solutions are Oracle-certified and eliminate many of the operational challenges organizations face in the implementation and deployment of the Oracle E-Business Suite.

Unitask's installed base includes customers in the Americas, Europe, Pacific Rim, and the Middle East. Unitask touches multiple industries, with a core concentration in industrial supply and manufacturing, computers and equipment, construction and engineering, utilities and energy, and healthcare and insurance.

“We are pleased to continue to offer products to enhance the Oracle E-Business Suite, and coupled with the recent improvement in the economic climate, we expect to continue to drive positive growth for Unitask as we enter 2010.” said Royal.

#### **About Unitask**

Unitask is committed to helping organizations implement, manage and run their Oracle E-Business Suite. Unitask creates, sells and supports software products based on experience gained from over a decade of Oracle E-Business Suite implementation projects. Customers of the Oracle E-Business Suite around the world rely on Unitask products to eliminate implementation and operational risk, improve the quality of the application and accelerate time-to-value.
